

*Elliott 50105R-50 Ton*

When it comes to design and engineering, Elliott's Boom Truck is generations apart from the traditional crane – making it ideal for the exacting demands of today's job sites. With an industry-leading 18 ton capacity on a single axle chassis, the Boom Truck delivers high performance with increased efficiency – from its high-speed outrigger set-up, boom extension and retraction to its high-pull winch.

Boom Trucks require very little maintenance thanks to its layaway hoist, 10 percent fewer fittings than competitor models and the industry's best warranty. That gives you time to enjoy operator amenities like the built-in cup holders and 110-volt charger on the operator console.

Imperial Crane Sales is now the Midwest dealer for the Elliott Boom Truck line. We look forward to providing excellent sales and service for all your Elliott Boom Truck needs.
